About us

David Gill Greenhouses is an Australian based, family owned business that has over 15 years of experience designing, manufacturing and building greenhouses for the horticulture and agriculture industry.

As a reliable business we place value on our client relationships and loyalty to the growing community. Our industry knowledge and expertise couples well with our quality product.

Our Mission

- To guarantee the highest level of quality in our construction services at fair and market competitive prices.
- To ensure needs are met with our clients and suppliers through customer satisfaction and excellent customer services at all times.
- To maintain the highest levels of professionalism, integrity, honesty and fairness in all relationships.

Glasshouses

David Gill Greenhouses is pleased to inform that we are now constructing glass-houses as well as green-houses and will be combining the skills and technology of Australian and Dutch companies.

Types

- Venlo Design

Quality

- Diffused light available
- Bay width 6.4m to 16m
- Toughened glass 91%
- Venlo 22% Ventilation
- Aluminium Gutters
- Aluminium Glazing bars
- Ridder Ventilation Mechanism
- Insulation area
- Packing area
- Under gutter cooling & air circulation

Complete Projects Including

- Thermal Screens
- Water & Climate
- Electrical
- Benching systems
- Concrete
- Heating
- Computer

Gothic Design

The design of the gothic shaped greenhouse can either have a single or double ventilator that extends above the ridge to give the plants a complete air change.

The Gothic shape forces all condensation to run off into the gutter for collection, eliminating condensation rain on your crop.

The double vent system ensures the greatest control over your crop environment reducing plant stress, resulting in better returns.

Bay width is 8 or 9.6m

DOUBLE VENT

CROP COVER 1

Crop Cover

100% relocatable, this cover gives the added benefit of being movable to any location. You can choose greenhouse film or shadecloth, or even a combination of both. We cater to your growing needs.

CROP COVER 2

Hydronic Heating

Hydronic Heating provides:
Optimal crop growth
Humidity management
The replacement of heat loss

Hydronic Heating includes:

Steel pipes and grow tube heating, Boiler, pump and shint installation. Flue Gas Condensers, CO₂ distribution Heat storage tank, Nitrogen Installation, Manifold and connection lines, Tuberail and pathwall Heating, Tuberail Supports, Thermal Insulation

Circulation Fans

5750 cubic metres per hour
7000 cubic metres per hrs
low amps
energy saving fans

Gas Heating

Direct fired gas heaters
Low nox, quality burners
for maximum efficiency,
Air throw 40/45 mts
German electric motors
Electronic ignition

Climate Control

The Sirius-GC climate control computer for the control of ventilation and heating of horticultural greenhouses. The control box climate control provides reassurance when you are not onsite

Fogging

The use of fogging can help reduce temperatures and increase humidity levels all year round; helping to create the perfect growing conditions for your plants.

Irrigation

- No dripping
- Flat and high trajectory
- Full overlap or strip irrigation
- Excellent distribution uniformity
- Acid resistant
- Interchangeable components

Harvesting Support Automatic from Harvesting to Packing

Cut down on your physical labour and discover what the latest technology can do for your commercial projects to-day. Guaranteed to save you money, time and effort

Svennson Thermal Screens

control light, save energy, control humidity, increases production, closed weave prevents heat escaping at night and open weave allows air to escape.

Benches

Aluminium rolling benches to maximise the floor space by rolling sideways with one pathway, comes with plastic or metal mesh. Steel rolling transport benches can be custom made to suite your application.

Agents for Ridder Ventilation Systems

drive to Innovate

Ridder are world leaders in ventilation drive systems

Ridder have a large range of geared motors and accessories for all ventilation applications.

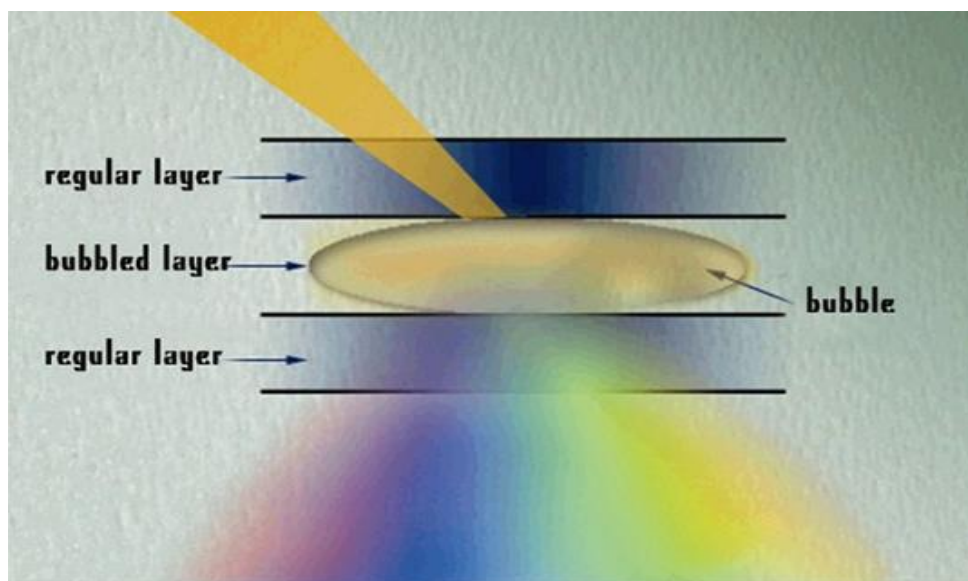

Agents for Politiv

Growplus Bubble film

200 mic, 100% usable light, 50-75% diffusion,

Diamond 15

200mic, extra strength, 90% light, 55% diffusion, anti-fog is part of the inner layer and available in anti-dust

Custom designed aluminium

Single and Double Locking system

Aluminium gutters

Aluminium Awnings

Ridge cap and arms for for polycarbonate

Aluminium curtain rail
